نضيف فقط:

modules/Arp.php (NEW)

core/Scanner.php (UPDATE)

1. ARP MODULE (IMPORTANT)

modules/Arp.php

```
<?php
```

```
function getARPTable()
{
    $output = shell_exec("ip neigh");
    $lines = explode("\n", trim($output));

    $table = [];

    foreach ($lines as $line) {

        if (!$line) continue;

        preg_match('/(\d+\.\d+\.\d+\.\d+)/', $line, $ip);
        preg_match('/lladdr\s+([0-9a-f:]+)/i', $line, $mac);

        if (isset($ip[1])) {
            $table[$ip[1]] = $mac[1] ?? "unknown";
        }
    }

    return $table;
}
```

2. UPDATE SCANNER

core/Scanner.php (V2)

```
<?php

require_once __DIR__ . "/Network.php";
require_once __DIR__ . "../modules/Ping.php";
require_once __DIR__ . "../modules/Arp.php";

function scanNetwork($ips)
{
    $alive = [];

    echo "Phase 1: Ping Sweep...\n";

    foreach ($ips as $ip) {

        exec("ping -c 1 -W 1 $ip > /dev/null 2>&1", $o, $status);

        if ($status === 0) {
            $alive[] = $ip;
        }
    }

    echo "Phase 2: ARP Table...\n";

    $arp = getARPTable();

    return [$alive, $arp];
}
```

3. UPDATE run.php

run.php (V2)

```
<?php
```

```
require_once "core/Network.php";
require_once "core/Scanner.php";
require_once "services/DeviceBuilder.php";
require_once "modules/Arp.php";
```

```
echo "NETVISOR V2 - REAL DEVICE DISCOVERY\n\n";
```

```
$network = getLocalNetwork();
$ips = generateIPs($network);
```

```
list($alivelps, $arp) = scanNetwork($ips);
```

```
echo "===== DEVICES FOUND =====\n\n";
```

```
foreach ($alivelps as $ip) {
```

```
    $mac = $arp[$ip] ?? "unknown";
```

```
    echo "IP: $ip | MAC: $mac\n";
}
```

```
echo "\nTOTAL: " . count($alivelps) . "\n";
```
